

Assurance Statement Number: CCP 267918/PMI/2023/06/06

NATURE AND SCOPE OF THE ASSURANCE ENGAGEMENT

SGS United Kingdom Limited was commissioned to provide independent assurance of Environmental, Health and Safety (EHS) data and Key Performance Indicators (KPI's) (reconciled) for the calendar year 2023 for:

Philip Morris Products S.A. (PMI)
Av. de Rhodanie 50
1007 Lausanne
Switzerland

The scope of the engagement included assessment of the Environmental, Health and Safety, Key Performance Indicators and underlying data shown in the tables below.

The management of PMI is responsible for the selection, preparation and reporting of information included in its 2023 EHS KPI report. It is SGS' responsibility to express an independent opinion on the reported data within the scope of assurance.

The objective of the engagement was to provide assurance to PMI stakeholders (with the exception of scope 3 emissions) to a reasonable level of assurance that the reported indicators are:

- Accurate and free from material misstatement (5% materiality level applied)
- Reported in accordance with the principles of transparency accuracy, consistency, relevance, and completeness and in accordance with a PMI defined methodology.

For Scope 3 emissions to a limited level of assurance that the reported data are:

- Accurate and free from material misstatement (10% materiality level applied)
- Reported in accordance with the principles of transparency accuracy, consistency, relevance, and completeness and in accordance with a PMI defined methodology.

The engagement was based on the scope, objectives and criteria as agreed between Philip Morris Products S.A. and SGS United Kingdom Limited in September 2023.

The engagement was combined with the verification of greenhouse gas emissions (GHG), and the assurance methodology employed by SGS was based upon internationally recognized standards and guidance meeting the requirements of ISAE 3000 (revised): *Assurance Engagements Other than Audits or Reviews of Historical Financial Information*. The engagement comprised a combination of desk-based review and interviews with relevant employees and review of evidence during site audits, remotely undertaken for the following facilities/areas: Turkey Markets; Swedish Match - Owensboro Factory (USA), Poland (Krakow), South Africa (Leonard Dingler) and Canada (RBH Quebec).

The environmental information provided was based on a combination of historical data, estimation methodologies and data extrapolation considered representative of calendar year 2023.

STATEMENT OF INDEPENDENCE AND COMPETENCE

The SGS Group of companies is a world leader in inspection, testing and verification, operating in more than 140 countries and providing services including management systems and service certification; quality, environmental, social, and ethical auditing and training; environmental, social and sustainability report assurance. SGS United Kingdom Limited affirm our independence from PMI, being free from bias and conflicts of interest with the organisation, its subsidiaries, and stakeholders. The assurance team was assembled based on their knowledge, experience and qualifications for this assignment, including experience in the assurance of environmental and health and safety data.

CONCLUSION

SGS' approach is risk-based, drawing on an understanding of the risks associated with determination of EHS information and the controls in place to mitigate these risks. Our examination included assessment, on a sample basis, of evidence relevant to the voluntary reporting of the data in the tables below:

Topic	Indicator	Units	Scope	2023 Estimated – Reported Dec 2023	2023 – Reconciled Value	Company
Water	Total amount of water consumed (withdrawn minus discharged)	'000 m3	Manufacturing	1,534	1,465	PMI
Water	Total water consumption from all areas with water stress in megaliters (withdrawn minus discharged)	'000 m3	Manufacturing	1,081	1,067	PMI
Water	Total amount of water withdrawn	'000 m3	Manufacturing	3,194	3,181	PMI
Water	Total amount of freshwater water withdrawn (from Municipal)	'000 m3	Manufacturing	2,196	2,173	PMI
Water	Percentage of total direct factory water withdrawal from water stressed area	%	Manufacturing	64%	64%	PMI
Water	Total amount of water discharged	'000 m3	Manufacturing	1,660	1,716	PMI
Water	Total amount of water discharged to areas with water stress	'000 m3	Manufacturing	968	974	PMI
Water	Manufacturing water use	m3/ mio. Cig. Eq produced	Manufacturing	3.81	3.90	PMI
Waste	Total amount of waste generated	Metric tons	Manufacturing	127,493	127,931	PMI
Waste	Proportion of operational waste to landfill (scope for zero waste to landfill target which excludes mandated waste to landfill)	%	Manufacturing	0.10%	0.12%	PMI
Waste	Tons of operational waste to landfill (scope for zero waste to landfill target which excludes mandated waste to landfill)	Metric tons	Manufacturing	130.2	147.1	PMI
Waste	Proportion of total waste generated that is disposed to landfill	%	Manufacturing	0.97%	0.91%	PMI
Waste	Proportion of total waste generated that is incinerated with energy recovery	%	Manufacturing	13.3%	13.9%	PMI
Waste	Proportion of total waste generated that is incinerated without energy recovery	%	Manufacturing	0.8%	0.9%	PMI
Waste	Proportion of total waste generated that is recycled	%	Manufacturing	84.9%	84.2%	PMI
Waste	Proportion of factories with <1% of waste to landfill (virtually zero)	%	Manufacturing	97.6%	95.2%	PMI
Waste	Amount of hazardous waste generated	Metric tons	Manufacturing	2,228	2,428	PMI
Waste	Percentage of hazardous waste generated	%	Manufacturing	1.7%	1.9%	PMI
Waste	Proportion of hazardous waste generated that is disposed to landfill	%	Manufacturing	1.5%	1.5%	PMI
Waste	Proportion of hazardous waste generated that is incinerated with energy recovery	%	Manufacturing	49.9%	47.1%	PMI
Waste	Proportion of hazardous waste generated that is incinerated without energy recovery	%	Manufacturing	29.5%	32.6%	PMI
Waste	Proportion of hazardous waste generated that is recycled	%	Manufacturing	19.1%	18.8%	PMI
Energy	Total energy consumption	GJ	Manufacturing, Fleet, Office, Warehouse, Other, Retail, Aircraft	7,978,824	7,850,016	PMI
Energy	Total energy consumption	GJ	Manufacturing	6,428,127	6,309,746	PMI
Energy	Total energy consumption	GJ	Fleet & Jet	1,216,497	1,222,576	PMI
Energy	Manufacturing energy use	GJ / mio cig.eq. Produced	Manufacturing	7.67	7.73	PMI
Energy	Fleet energy consumption	MJ per km Driven	Fleet	2.68	2.70	PMI
OHS/Emissions	PMI Total km driven	Km	Fleet	443,577,282	442,467,901	PMI
Energy	Total energy consumption from renewable sources	GJ	Manufacturing, Fleet, Office, Warehouse, Other, Retail, Aircraft	2,923,565	2,977,350	PMI

Topic	Indicator	Units	Scope	2023 Estimated – Reported Dec 2023	2023 – Reconciled Value	Company
Energy	Total energy consumption from renewable sources	GJ	Manufacturing	2,784,225	2,836,176	PMI
Energy	Proportion of energy consumption (electricity & fuel) from renewable sources	%	Manufacturing, Fleet, Office, Warehouse, Other, Retail, Aircraft	37%	38%	PMI
Energy	Proportion of energy consumption (electricity & fuel) from renewable sources	%	Manufacturing	43%	45%	PMI
Energy	Proportion of electricity consumed at our factories that came from self-generated sources	%	Manufacturing	4%	3%	PMI
Energy	Total electricity consumed	MWh	Manufacturing, Fleet, Office, Warehouse, Other, Retail, Aircraft	884,927	875,107	PMI
Energy	Total electricity consumed	MWh	Manufacturing	817,073	810,479	PMI

* Refers to the retroactive compensation of a year's residual Scope 1 and Scope 2 emissions (i.e., 2022) through the cancellation of carbon credits during the reporting year (i.e., 2023).

** Net Scope 1 and Scope 2 emissions equals gross emissions during the reporting the reporting year (i.e., 2023) minus the retroactive compensation of the previous year's emissions (i.e., 2022).

*** Swedish Match (SWMA) subsidiary data is included for limited indicators only as identified above.

**** Comparison to 2019 Baseline data is based on restated 2019 Scope 3 absolute emissions re-calculated in 2024

Note that due to rounding, calculated emissions totals may vary by 1 tonne of CO₂e to the sum of individual figures indicated above.

Based on the data and information provided by Phillip Morris Products S.A. and the processes and procedures conducted, SGS concludes that:

- The KPI assessment methodology applied is sound and valid.
- The KPIs in the table above are accurate, complete, consistent, transparent, and free of material error or omission in relation to the PMI defined methodology.
